FINE PRINT

FIRING PRICES ARE BASED ON KILN SPACE USED, ENERGY CONSUMPTION, AND EQUIPMENT WEAR. THE STUDIO OFFERS SHELF-BASED, WEIGHT-BASED, VOLUME (MATRIX), AND KILN-HIRE PRICING OPTIONS. THE STUDIO RESERVES THE RIGHT TO APPLY THE PRICING METHOD THAT MOST FAIRLY REFLECTS KILN SPACE USED.

VOLUME-BASED PRICING IS CALCULATED USING THE BOUNDING DIMENSIONS OF THE WORK (HEIGHT × WIDTH × DEPTH), INCLUDING NECESSARY CLEARANCE FOR SHELVES, POSTS, STILTS, AND GLAZE SAFETY. FLAT FORMS SUCH AS PLATES AND PLATTERS ARE CHARGED USING A MINIMUM HEIGHT OF 5 CM FOR VOLUME CALCULATIONS. VOLUME PRICING REFLECTS KILN SPACE OCCUPIED, NOT THE AMOUNT OF CLAY USED.

VOLUME-BASED PRICING IS CAPPED AT THE FULL KILN HIRE RATE. WORK THAT APPROACHES OR LIMITS A FULL KILN LOAD MAY BE CHARGED AS KILN HIRE. THE STUDIO MAY RECOMMEND SHELF PRICING OR KILN HIRE WHERE THIS IS THE FAIREST OPTION.

ALL MEASUREMENTS AND WEIGHTS MAY BE ASSESSED OR VERIFIED BY STUDIO STAFF. STUDIO MEASUREMENTS ARE FINAL.

FIRINGS MAY BE DELAYED TO ALLOW FOR EFFICIENT KILN LOADING. NOT ALL WORK WILL BE FIRED IMMEDIATELY.

ONLY STUDIO-APPROVED GLAZES MAY BE USED UNLESS PRIOR APPROVAL IS GIVEN. WORK MUST BE CLEAN, APPROPRIATELY WAXED, AND PREPARED TO AVOID DAMAGE TO SHELVES AND KILN FURNITURE. ANY DAMAGE CAUSED BY GLAZE RUNS OR UNSUITABLE PREPARATION MAY BE CHARGED TO THE MAKER.

WHILE ALL CARE IS TAKEN, CERAMICS ARE FIRED ENTIRELY AT THE MAKER'S RISK. THE STUDIO IS NOT RESPONSIBLE FOR CRACKING, WARPING, GLAZE DEFECTS, BREAKAGE, OR UNEXPECTED FIRING OUTCOMES.

VERY LARGE, HEAVY, OR UNUSUALLY SHAPED WORK MUST BE DISCUSSED WITH STAFF PRIOR TO FIRING.

FIRING RATES ARE REVIEWED PERIODICALLY AND MAY CHANGE TO REFLECT ENERGY, MAINTENANCE, AND OPERATIONAL COSTS.
